

Department of Health

KATHY HOCHUL
Governor

MARY T. BASSETT, M.D., M.P.H.
Commissioner

KRISTIN M. PROUD
Acting Executive Deputy Commissioner

Friday, Feb. 3:

Based on the assessment conducted on February 3, 2022 by the Department, the following hospitals no longer meet the criteria for limitation and can plan to resume non-essential elective procedures as soon as the hospital is operationally prepared to restart these procedures:

- Mount St. Mary's Hospital and Health Center
- Brooks – TLC Hospital System, Inc.
- St. Mary's Healthcare

As a result of the Department's assessment conducted on February 3, 2022, the hospitals below are required to defer all out-patient non-essential procedures performed within the hospital that result in admission to an inpatient or observation bed. An impacted facility may restart performing non-essential outpatient elective procedures within the hospital as long as these patients can be discharged after the procedure and do not require overnight stay in an inpatient or observation bed. Additionally as noted last week, these hospitals may continue to do elective ambulatory procedures at hospital-owned ambulatory surgery centers.

- Faxton-St. Luke's Healthcare St Luke's Division
- Geneva General Hospital
- Sisters of Charity Hospital
- Oneida Health Hospital
